Ashley Action!

Black History Month happens in the United Kingdom every October and celebrates, recognises and values the inspirational individuals and events from within the BME community. As part of their PSHE lessons students have been researching about famous people/events that happened. Rosa Parks and Martin Luther King are just a few of these iconic figures.

Community Sports Year 12 students have been researching different types of sports in the local community. Students have been finding out about a particular sport that they would like to explore and take part in. This week they visited Victoria Park in Widnes and participated in a game of Tennis and Geocaching (an outdoor recreational activity, in which participants use a Global Positioning System receiver or mobile device to hide and seek containers, called "geocaches" or "caches", at specific locations marked by coordinates all over the world).

Gardening Another busy lesson laying topsoil and tidying the planters at the back of school. The outcome will eventually be transformed into a Japanese Garden. Well done to all students for their hard work!

Year 8 students have been introduced to pastry products. Students have learnt how and why different components are combined when making pastry. Students have also considered the functions of ingredients when making pastry products.

A reminder that we are still collecting used batteries for 'The Big Battery Hunt'. For more information visit:

Skills Challenge – Staying Positive

When inventing the lightbulb Thomas Edison tried and failed many times. He is quoted as saying, 'I have not failed. I have just found 10,000 ways that do not work'. Talk to a family member about this quote. Share your feelings about a time when you have experienced a sense of failure and how you kept going.
